BRAINHACK DONOSTIA 2026

RNN NIGHT FEVER

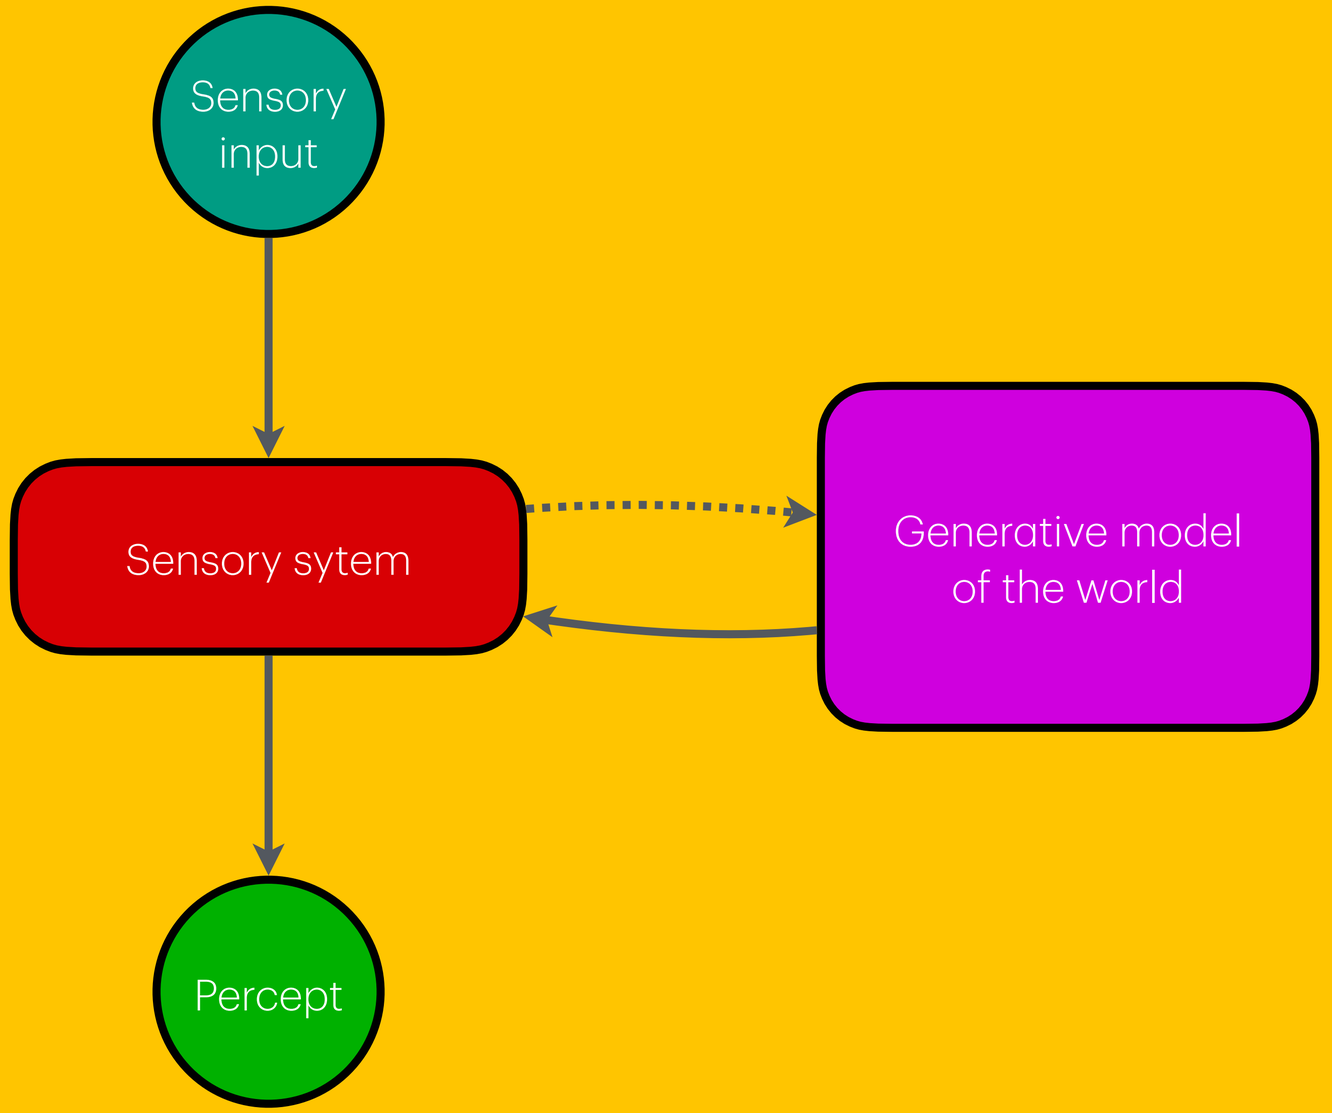

Does hippocampal replay emerge when recurrent neural networks go to sleep?

github.com/qtabs/rnn-night-fever

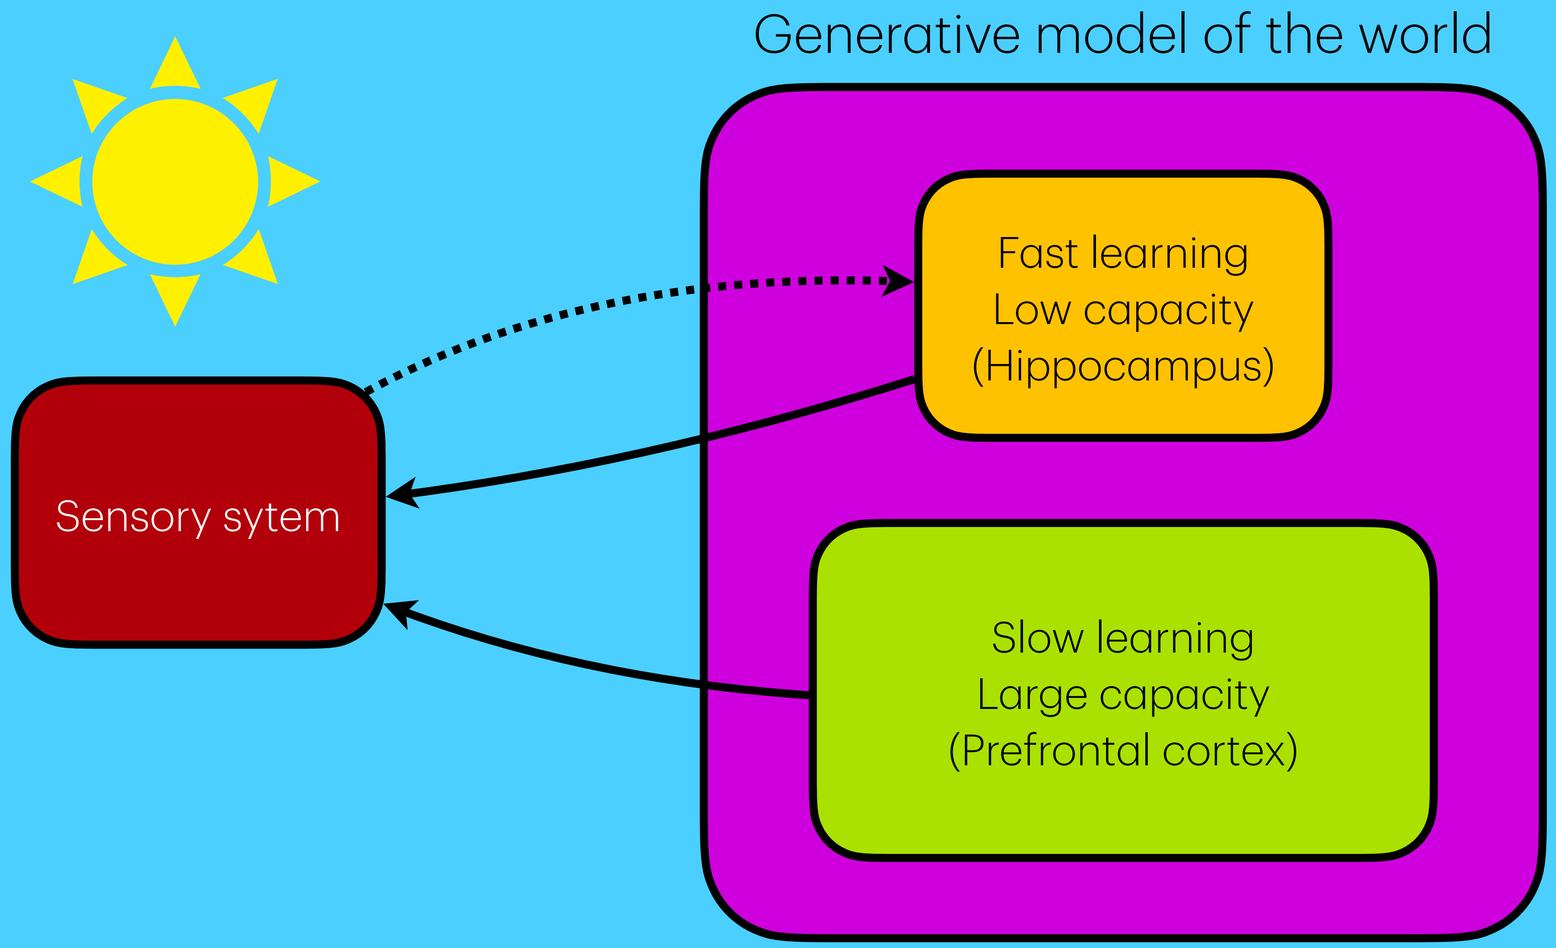

To perceive we first need to understand the world

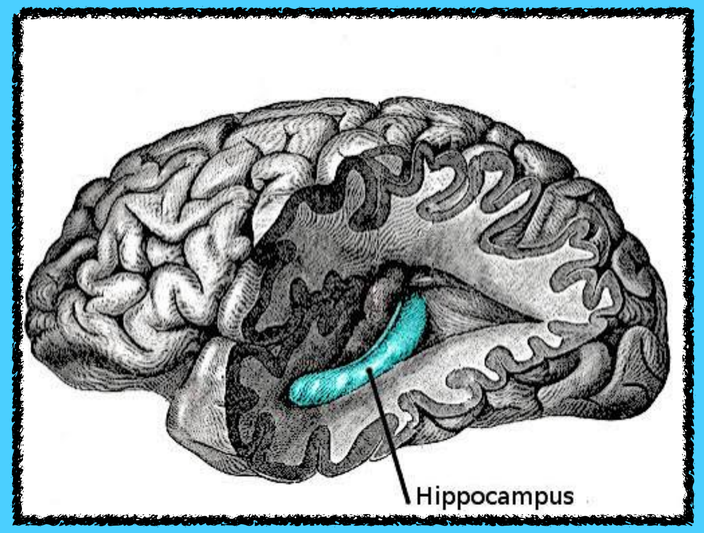

[Aitchison & Lengyel 2017 TICS]

But how do we learn the structure of the world?

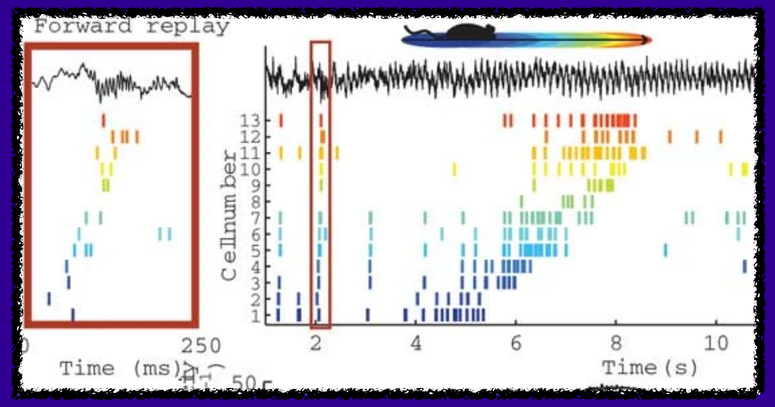

Henry Gray (1918) Anatomy of the Human Body, Plate 739

complementary systems hypothesis

[Singh, Norman, & Schapiro 2022 PNAS]

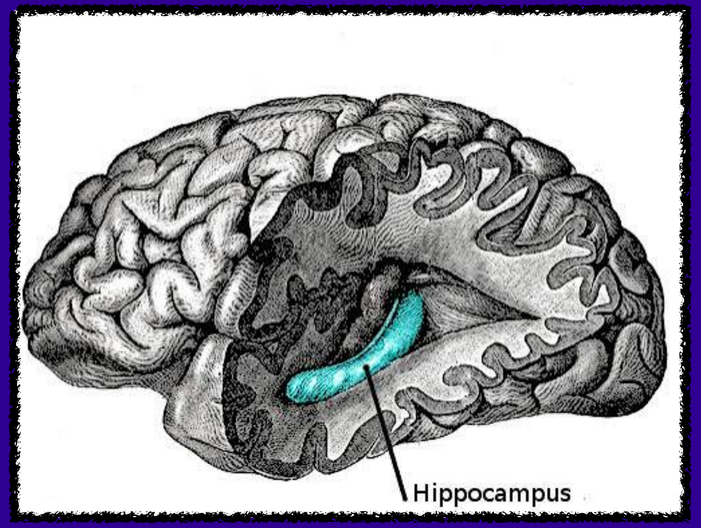

Memory consolidation through hippocampal replay

Carr, Jadhav & Frank; Nat Neuro 2011; Figure 1

Fast learning
Low capacity
(Hippocampus)

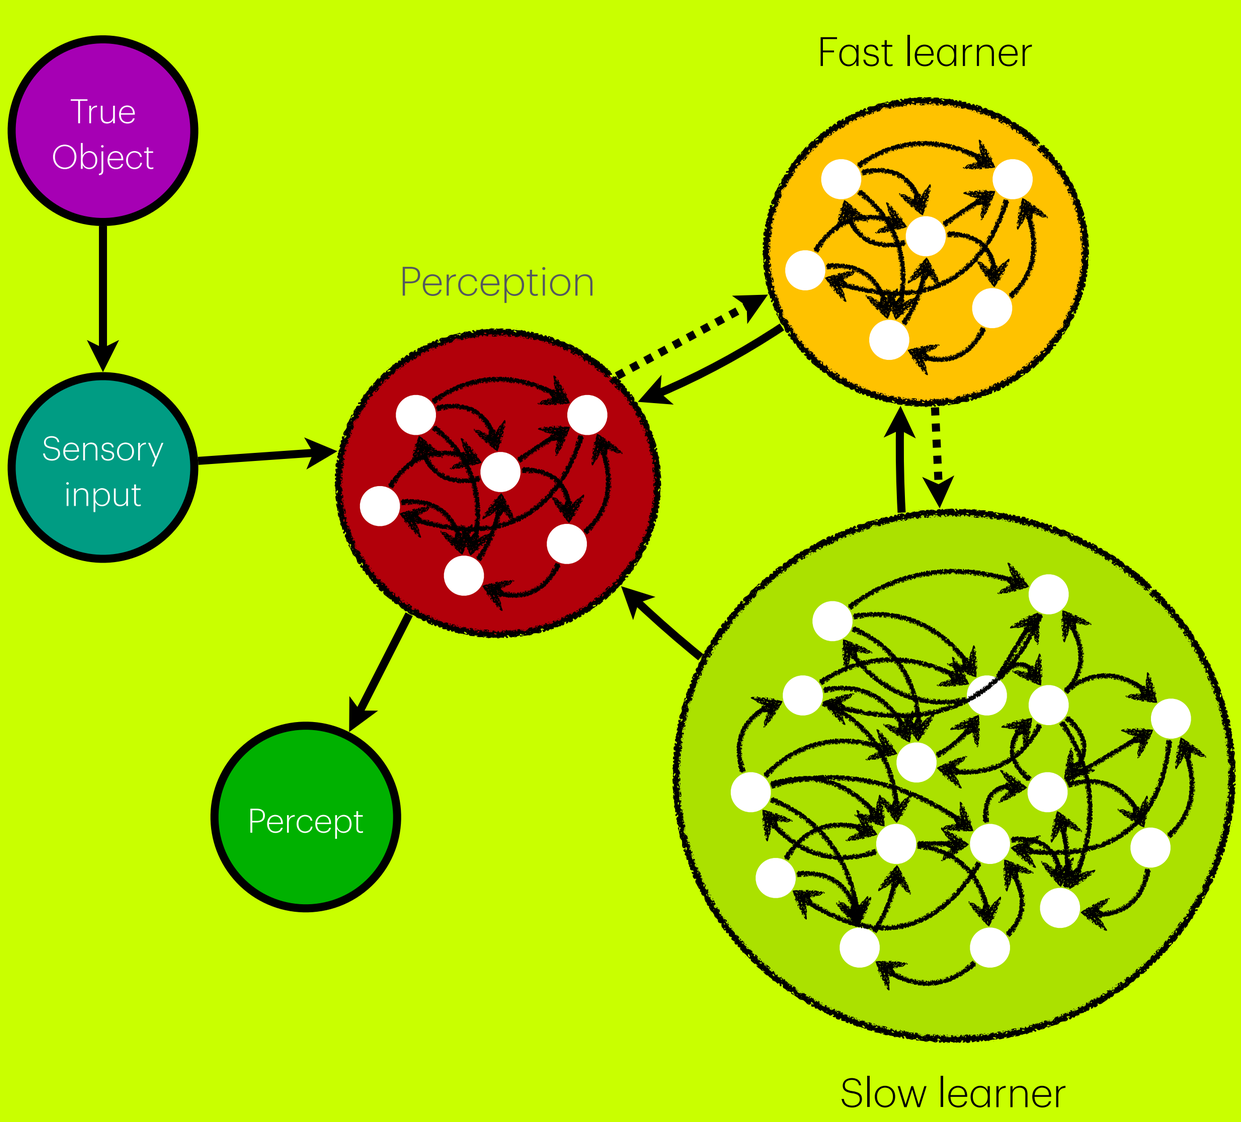

Slow learning
Large capacity
(Prefrontal cortex)

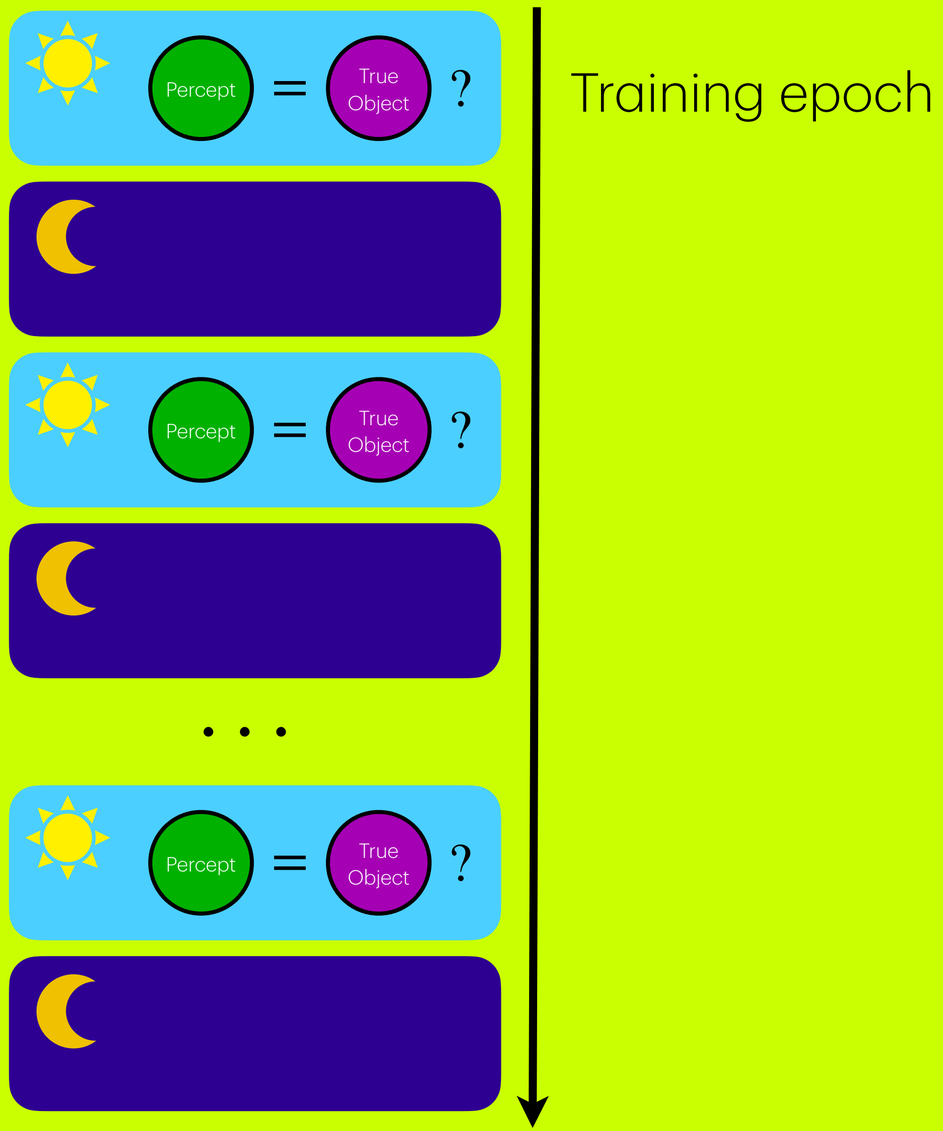

Henry Gray (1918) Anatomy of the Human Body, Plate 739

[Spens & Burgess 2024 HNB]

Is hippocampal replay the optimal learning strategy?

Join Us for CCN 2027 in Edinburgh!

The 10th annual conference on Cognitive Computational Neuroscience will be held Edinburgh, UK from Monday, July 26 through Thursday, July 29, 2027.

Important Dates

February 1, 2027 - 8-page Proceedings Abstract Deadline
February 4, 2027 - 8-page Proceedings Full Paper Deadline
March 18, 2027 - Event submission deadline (e.g., GACs, Community Events)
April 1, 2027 - 2-page Extended Abstract Submission Deadline
May 20, 2027 - Early Registration Deadline
July 26-29, 2027 - CCN 2027, Edinburgh International Conference Center

In conclusion:

- Hands-on neuroAI at its finest
- RNNs that sleep (and possibly snore)
- Bee-Gee themed presentations guaranteed
- CCN submission ready in 3 days!*
- Absolutely unrealistic goals and timelines
- What else?

* No way we willl manage!
